

PROTECTIVE WELDING PASTE

- Prevent burr sticking to the nozzle and contact tip at MIG/MAG welding
- It does not prevent the welded surface to hold paint. It can be cleaned with solvents.
- Extends the time of use of nozzle and contact tip
- Increases the quality of welding.
- Does not contain silicone.

Application

- Immerse the tip of the hot nozzle into a 1 cm paste.
- Hold the torch with the nozzle tip facing up for a short time and continue welding.
