

Product Characteristics

- Thanks to the bottom suction system, smoke and dust are extracted before reaching the operator's respiratory tract.
- Thanks to its solid material structure, it provides the opportunity to work safely on it.
- Thanks to the integrated dust tray, the accumulated particles are easily cleaned
- Ergonomic design provides comfortable working opportunity
- Thanks to the wooden grid, the painted parts will not be scratched.
- It prevents the particles from spreading around with its 3-sided closed shield system.
- Thanks to the plug fan, it provides low noise and high performance.
- It can be easily moved thanks to its wheeled structure.

Areas of Use

- Designed to extract dust generated during grinding applications of small metal parts
- Suitable for welding applications
- Suitable for smooth and rough grinding

General Filter Data

Filter Method	Polyester
Filter Class	M6
Filter Type	PTFE membran

Technical Details

Height of the Bench	750 mm
Engine Output	2,2 kW
GKTF/1500 DÜZ h	400mm 351SPR1540
GKTF/1500 DÜZ h	400mm 351SPR1540
Extraction capacity	6000 m³/h
