

HEALTH & SAFETY & ENVIRONMENT POLICY

GEDİK KAYNAK SAN. A.Ş. A.Ş. has established living management systems for application in order to systematically identify the points that will affect the Occupational Health and Safety and the Environment at every stage of its production and service activities in the field of welding technologies and welding consumables.

GEDİK KAYNAK SAN. A.Ş. A.Ş. is aware of the fact that Occupational Safety and Environmental problems are important problems of the world and aims to leave a livable world to future generations. In this context;

- To fulfill its legal and other obligations in order to ensure environmental safety and Occupational Health and Safety,
- To provide the necessary support for the prevention of pollution at its source and sustainable resource use,
- To use natural resources and energy efficiently,
- To raise awareness of its personnel, customers, subcontractors and guests by training them on Environmental and Occupational Health and Safety issues,
- To reduce risks and eliminate hazards by conducting risk analysis in order to prevent environmental and occupational accidents,
- To ensure the participation and consultation of employees and/or employee representatives,
- We are committed to increasing environmental performance by continuously improving the Occupational Health and Safety and Environmental Management System we have established, and to take the necessary measures to prevent injuries and health deterioration.
- To protect the natural environment, to be sustainable, to reduce the impact of products on the environment, to be environmentally friendly, sensitive to climate change and the environment, to be energy efficient and to analyze the best technologies and to adapt them to the processes.
